### LeanCor Canada Opens Its Doors for Business

---

Kitchener, ON – January 16, 2009 – In these uncertain economic times you need to have the right partner working to get the right things done in every aspect of your business, especially supply chain management. As such, we are pleased to announce the establishment of LeanCor Canada, Inc a non-asset based 3PL that does much more than just move freight.

LeanCor Canada, Inc delivers lean supply chain training, consulting, and operations to companies embracing or ready to embrace lean and operations excellence. These services support companies throughout any and all stages of their lean journey, from design to execution, as they work to reduce total logistics cost, eliminate waste, and increase competitive advantage. From development of the individual professional to creation of a corporate lean supply chain strategy to operations outsourcing, LeanCor Canada, Inc is a partner you can count on! Utilize lean training to prepare your people and develop them into problem solving experts. Perfect your processes through lean consulting and create a solid foundation of quality and efficiency. Complete your transformation through lean operations to execute and sustain operations excellence.

LeanCor Canada, Inc. is located in Kitchener, ON and was founded by supply chain professionals with operational experience in the Toyota Production System and other lean environments. LeanCor is the only 3PL dedicated to the application of lean principles throughout the supply chain. Through its partnerships with established, forward thinking entities and three value streams LeanCor is designed to support companies throughout their lean journey.

If you are interested in learning more, then join LeanCor in Toronto, ON for "Lean Warehousing Essentials," a two-day seminar March 16-17, 2009. Are you looking to reduce costs, inventories, space and waste in your operation? Then use this opportunity to create a tactical plan for your own Lean improvement initiatives.
