

Lean in Logistics & the Supply Chain

April 13-15, 2010 | Nashville, TN

Two workshops to help you re-think logistics and supply chain management to create maximum value at minimum total cost

LeanCor and the University of Tennessee Center for Industrial Services have partnered to bring you two workshops over three consecutive days of interactive learning based on real world lean supply chain experience. LeanCor is recognized as the leader in lean supply chain management and has certified over 500 individuals. As a training, consulting, and operations provider, LeanCor is able to successfully connect lean theory to the realities of supply chain operations. Lecture, break out exercises, individual work outs, small and large group discussion, video and simulations will all be used to support various learning styles, repeatedly engage students, and increase knowledge comprehension and retention.

Who should attend?

What will I learn?

- Apply lean theories, principles and tools to supply chain and logistics functions.
- Connect existing lean manufacturing programs to lean logistics as the next step in your lean journey.
- Utilize structured problem-solving and project management tools for today's global logistics challenges.
- Receive a high level roadmap to implement your desired lean future state.
- Understand the impact of strategic decisions from a total cost point of view.

Sign up for one or both of two workshops:

- April 13: Lean Logistics Fundamentals
- April 14-15: Implementing the Lean Supply Chain

About LeanCor

LeanCor is the only Third Party Logistics Provider (3PL) wholly dedicated to the application of lean principles throughout the supply chain's functions.
